- Bootstrap / React Bootstrap
- Problem solving
- GitHub
- JavaScript
- Sass
- Redux Toolkit
- OOP

Projects

Portfolio (My own design) [↗](#)

Modern-Ecommerce [↗](#)

A Theme forest cloned project which is an Ecommerce shop which contains: Trending products slider, Dark Mode, Live search in the products, Filtering by price range, categories and owners all in the same time, Local Storage, Add & remove from cart and favorites, Single product page.

Car-Garage-Ecommerce [↗](#)

A Theme forest cloned project which is an e-commerce shop built using Bootstrap , React and Redux-Toolkit that contains filtering by price range, categories, the ability to add and remove items from cart , a single product page ,and pagination without using libraries.

Real Estate App (RapidAPI) [↗](#)

This real estate project is a fully responsive web application that uses data from RapidAPI. The app fetches property listings from the API and displays them . Users can search for properties by purpose , rent frequency , price, area, number of bedrooms and bathrooms, and property type. The app also includes pagination and a single property page for each listing, which provides more detailed information about the property.

Yachts-Ecommerce [↗](#)

A Theme forest cloned project which is an Ecommerce shop which contains: Filtering by price from high to low & vice versa and by categories, Add & remove from cart, Single product page, Modals, Responsive design.

Weather-App (using 2 apis) [↗](#)

A Weather application built using two apis, one of them was used to get the cities and their latitude and longitude and the other was used to get the forecast.

Firebase E-commerce (with a simple dashboard) [↗](#)

This e-commerce shop features live product search, a sale countdown, and category filtering. Data is stored locally, and users can add and remove items from their cart. The shop has a single product page, login and signup with Firebase Auth, product retrieval from Firebase Firestore, and a simple dashboard for adding and deleting products and viewing current users.

Multi-themed Dashboard [↗](#)

Fully Responsive Multi-themed Dashboard website that contains dark mode, Charts, Tables and local storage.

Tech Company (Multiple languages) [↗](#)

Tech company website built using Firebase and supports multiple languages.
